- ✓ Sliding Shrouds
- ✓ Brushes (various sizes)
- ✓ Cleaning Solutions
- ✓ Neutraliser
- ✓ Marking Solution

## New Models Released

• Weldbrush proudly announce an upgrade to the WB400 - the WB500. Like its predecessor the WB500 will clean, mark, polish, and plate, and, as well, delivers 25% more electric current.

• Weldbrush also proudly announces the WB450C, our entry level 450W machine, that matches the WB400 for performance. The WB450C is ideal for cleaning and marking.

## WB500 WELD CLEANER

Introducing the WB500, the latest in fast and affordable weld cleaning technology from the leaders in the field.

### CLEANS & POLISHES METAL WELDS WITH EASE

This fast Weld Brush is compact, rugged, acid resistant, and easy to carry.

This single unit, will clean stainless steel, brass, and bronze, after they have been heat tinted, or TIG, MIG, or Spark welded.

As well as cleaning, the unit can electro-polish, mark, or brush electro-plate the same metals.

### SLIDING SHROUD FOR CLEANING POWER

Our patented Sliding Shroud is the white shroud at the end of the wand.

This will not only protect the shell of the brush from shorting in confined spaces, but, as well, by restricting the splay of the brush, it concentrates the cleaning power into a smaller, and better defined area.
